

# McGraw Systems LLC to present bStable™ at the 2009 International Review of Bipolar Disorders in Lisbon, Portugal.

WOBURN, Mass. – March 3, 2009 – McGraw Systems LLC today announced the company has been selected to present at this year's 2009 International Review of Bipolar Disorders (IRBD) conference to be held at the Reitoria da Universidade de Lisboa, in Lisbon, Portugal. McGraw Systems' President and CEO Benjamin F. McGraw IV will host an interactive seminar entitled Computerized Life Management Systems on the third day of the conference (Friday May 8, 2009). The session will be chaired by Dr. Andreas Erfurth where Mr. McGraw will discuss the work McGraw Systems has done with its flagship product, bStable™ – the only comprehensive personal life management system for individuals suffering from Depression and Bipolar Disorder.

The International Review of Bipolar Disorders (IRBD) established in 2000 is the world's largest and most successful annual Bipolar Disorders event. The aim of the IRBD is for experts to provide review summaries of progress in Bipolar Disorders research to an audience of clinically orientated physicians. The event attracts upwards of 60 of the world's best Bipolar experts to speak each year.

"We are extremely grateful for this tremendous opportunity to present our work at this leading edge conference. We have experienced a strong interest in bStable™ since the product launch at the 2008 Depression and Bipolar Support Alliance (DBSA) conference in Norfolk, Virginia. We hope to expand awareness of bStable™ to the larger international community to help patients and loved ones suffering around the world with this challenging disorder." said Benjamin F. McGraw IV, President and CEO of McGraw Systems LLC."

bStable™ tracks and manages every aspect of the patient's life impacted by Depression and Bipolar Disorder including crisis planning, scheduling, expense tracking, thought conditioning and thought management. Over 40 rich, interactive, graphical reports are standard with bStable™. These reports provide an updated status on the patient's life and can be consolidated and sent to medical professionals and loved ones for preventative care. bStable™ also has a module focused on adolescents and children. This module allows the tracking of behavior exhibited by adolescents or children suspected of having bipolar disorder symptoms.

bStable™ retails for \$99 . Additional copies of bStable™ for loved ones or medical professionals associated with the patient can be purchased at the normal friend, family, or medical provider rate of \$49.
